

Main Antarctic Facilities operated by National Antarctic Programs in the Antarctic Treaty Area (South of 60° latitude South)

Important Information:

The publication of details of these facilities does not imply any right of use. The facilities are established and maintained by National Antarctic Programs strictly for their own use – they are not designed or provided for use by others. Prior agreement must be obtained to use facilities maintained by another operator. In particular, requests for access to airfields must comply with the procedures for coordination, approval and information described in the Antarctic Flight Information Manual published by COMNAP. For more information, contact the COMNAP Secretariat (<http://www.comnap.aq>)

Furthermore, the relevant legal instruments and authorisation procedures adopted by the states party to the Antarctic Treaty regulating access to the Antarctic Treaty Area, that is to all areas between 60 and 90 degrees of latitude South, have to be complied with. For more information, contact the Antarctic Treaty Secretariat (<http://www.ats.aq>)
